

TILEPLANNER

Online Design

What is it?

TilePlanner is the online design tool that can be customized, integrated, and used by your customers, with a completely personalized product catalog, all from within your website.

TilePlanner gives your customers the opportunity to quickly and intuitively create 3D design projects, with no installation and no training. TilePlanner can be used on any browser on your **Mac, PC, smartphone or tablet.**

What does it do?

Online design for homeowners and showroom designers. With **TilePlanner**, you can create custom 3D room models, print project summaries with material lists and estimates, and interact with advanced management systems such as **e-commerce** platforms.

With its specialized features, TilePlanner is structured as a **product configurator** for the **modular furniture** industry, as well.

Strengths

- Simple, fast, and easy to use.
- No installation necessary.
- High performing graphics engine with realistic material visualization.
- Custom print creation.
- Product configurator for modular furniture.
- E-Commerce ready with real-time material and price calculation.
- Compatible with DomuS3D for project refinement by showroom designers.
- Usage statistics.
